

ADRIAN YUSUFA RACHMAN

iOS, Android, Web Developer

(+62) 81333363559 · adrian.y.rachman@gmail.com · linkedin.com/in/adrian-rachman-432a60218 · [Portfolio](#)

Apple Developer Academy alumnus and Software Engineer specializing in mobile and front-end development. Skilled in Swift, SwiftUI, and React, with a strong foundation in modern web technologies. Passionate about crafting intuitive user interfaces while maintaining the full-stack understanding necessary to deliver production-ready applications.

WORKING EXPERIENCES

Apple Developer Institute for Entrepreneurship — Jakarta (Indonesia)

March - August 2026

Head of Product · iOS, Android & Web Developer

- Led the cross-platform expansion of RideCheck, engineering the migration from iOS to Android. Simultaneously developed the web portal for workshop partners, while integrating scalable monetization features to establish a sustainable product ecosystem.
- Engineered and shipped front-end features as a core contributor within a tight 4-person agile team. Hands-on in writing production-ready UI code, directly wiring backend integrations, and rapidly iterating on features through active prototyping and user testing.
- Achieved major commercial and cross-platform milestones for RideCheck, including:
 - Growth & Monetization: Scaled to **160,000+ downloads**, **29,000+ MAU**, **63,000+ registered vehicles**, and **2,300+ paying users**.
 - Product Usage: **209,000+ trips** and **2,000,000+ km** auto-tracked since May 2026, by riders in **60+ countries**.
 - App Store Success: Reached Top 9 in Utilities category.
 - Google Play Success: Secured Top 3 Grossing and #2 Top Free in the Auto & Vehicles category.
 - Social Media: 30,000,000+ views, 2,000,000+ engagements and 200,000+ profile visits across Instagram and TikTok.
 - B2B Partnerships: Successfully negotiated and signed operational partnerships with independent auto workshops.
 - High Level Networking: Initiated and currently managing strategic partnership discussions with Formula 4 Indonesia.
 - Industry Recognition: Competed in the Astronauts Competition, pitching RideCheck's technical innovation and market potential, and was featured in a Bloomberg Technoz article.

Apple Developer Academy @ BINUS — Bali (Indonesia)

February - December 2025

Junior iOS Developer

- Developed multiple iOS, iPadOS, and macOS apps using Swift, SwiftUI, and related Apple Technologies.
- Worked in agile, multicultural teams as the primary front-end developer, implementing UI designs, integrating backend features, and ensuring smooth functionality. Prioritized user-validated solutions through continuous prototyping and testing.
- Projects:
 - RideCheck - iOS vehicle health tracker app
 - Engineered a battery-efficient auto-tracking system leveraging CoreLocation, CoreMotion, and MapKit, utilizing Significant Location Changes (SLC) and Geofencing to background-track vehicle usage with minimal power drain. Built a scalable UI/UX, implementing adaptive views that support legacy iOS versions up to the latest.
 - Collaborated on full product lifecycle, from creating user flows and wireframes, managing code merges and resolving conflicts via GitHub to App Store deployment.
 - By December 2025, achieved viral market success, garnering 3,200+ organic downloads and 11,000+ impressions (29%+ conversion rate) via social media marketing, resulting in active revenue generation and a 5-star App Store rating. Presented product roadmap and technical architecture directly to the Deputy Minister of Komdigi, validating the solution's potential at a national level.
 - SwiSekai - macOS Swift learning platform
 - Designed and deployed a native Swift learning app to the Mac App Store.
 - Architected user flows, built responsive SwiftUI interfaces for dynamic window sizing, and integrated AI APIs for real-time content generation.
 - AI Journal - iPadOS AI-powered journaling tool
 - Built an offline, AI-assisted journaling tool using Apple MLX to perform on-device LLM functionalities.
 - BomBocLat - iOS pixel-themed bomb passing game
 - Designed and developed a pixel-art game using SpriteKit for mechanics and SwiftUI for the UI layer.
 - Managed the full product lifecycle from ideation to TestFlight deployment.

NEXSYS-ONE — Dubai (United Arab Emirates)

January - February 2025

Master User Intern

- Mastered system administration of the NEXSYS-ONE software.

- Collaborated with a team to convert given template designs into clean, design-accurate HTML/CSS pages.
- Supported front-end development for the main website under the guidance of a senior developer.
- Resulted in around 80 HTML/CSS templates, with several front-end pages implemented in the live production website.
- Developed "Reporthink Template Editor": A live, web-based reporting template editor that allows users to customize provided templates to fit their needs. Supports editing text, styles, layouts, and design elements, with features to save progress and export the final result as a PDF.

ORGANIZATIONAL EXPERIENCES

Prog{r}amming 5.0

August 2022-2023

Facilitator (5.1, 5.2, 5.3)

- Creating & compiling an easy-to-understand intermediate level coding game module for around 16-18 participants.
- Presenting and teaching materials, providing discussion forums with participants, assisting in creating the coding-based game.
- Accomplished a smooth-running event with satisfied participants.

Mentari IGNIGHT — Indonesia

January 2020 - 2021

Volunteer

- Co-organized the large-scale, 1000+ participants, inter-school IGNIGHT sport competition and assisted in organizing the IGNIGHT Concert, which invited the popular band "Reality Club" to perform.
- Assisted in organizing both events from start to finish, assisted in gathering sponsorship and became one of the operational teams.
- Resulted in a successful sponsored sport and concert event with satisfied participants.

EDUCATION LEVELS

Universitas Prasetiya Mulya — Indonesia

2021 - 2025

Major: Software Engineering

- Current GPA (3.51 / 4.00)

Mentari Intercultural School Bintaro — Indonesia

2017 - 2021

International Baccalaureate Diploma Program

- Total IB points (30/45)
- Cambridge IGCSE (International General Certificate of Secondary Education)
- Achievements: Award Of Excellence (most improved in a subject), Placed 1st in a video making competition, Award Of Excellence (Citizenship), Excellence award (Best Project), Certification of Appreciation (Most Behaved).

CONFERENCES

Konferensi Ilmu Sosial dan Ilmu Politik (KISIP)

2024

Participant

- Participated in a social and political science conference at KISIP held at Auditorium CSIS, Jakarta, on January 17th-18th, 2024.
- Created a data poster about Twitter discourse on the recent presidential election with the theme of multifaceted responses to election disinformation.
- Presented a data poster at KISIP.

SKILLS

Hard Skills

- Languages: Swift, JavaScript / TypeScript, Python, HTML/CSS, SQL
- Mobile Development: SwiftUI, React Native, SpriteKit, Cross-Platform Migration
- Web Development: ReactJS, NextJS, Tailwind CSS
- Tools & Deployment: Xcode, Android Studio, Git/GitHub, App Store Connect, Google Play Console, Figma
- Methodologies & Tech: Agile (Scrum), B2B Dashboard Architecture, API Integration, MLX / Local AI Integration

Core Competencies

- Agile Project Management, Technical Communication & Pitching, Cross-Functional Collaboration, B2B Stakeholder Management, Rapid Prototyping, Technical R&D.
- Languages: Indonesian (Native), English (Full Professional Proficiency), Japanese (Elementary)
